REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)
07703-414001

I hereby declare that:

Each Inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in the patent number 6,390,269, granted May 21, 2002 and for which a reissue patent is sought on the invention entitled Money Handling Mechanism With Peripheral Port, the specification of which was filed on May 19, 2004 as reissue application number 10/849,510.

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☒ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of others errors.

At least one error upon which is reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

Claim 1 has been amended by changing the word "enables" to "supports" so that the claim now recites that "the communications protocol supports communication between the internal controller and any one of at least first and second different types of device for handling money."

Claim 8 has been amended to recite that the internal controller is arranged to copy the content of "at least some" signals between the first port and the second port "without modification thereof." Similarly, claim 14 has been amended to recite that the content of "at least some" signals is copied between said first and second ports "without modification."

and having executed an application for United States Patent which was filed as Serial No. 09/546,126 on 10 April 2000 describing the said improvements and based thereon, and

WHEREAS, said improvements were made in the course of our employment by a subsidiary of MARS, INCORPORATED, a corporation of the State of Delaware having its principal place of business at 6885 Elm Street, McLean, Virginia 22101-3883, United States of America hereinafter called "the Assignee" (which term shall include its successors and assigns):

THEREFORE, for and in consideration of One Dollar (\$1.00) and other good and valuable consideration to each of us paid, the receipt of which is hereby acknowledged, we do hereby sell, assign and transfer to the Assignee our entire right, title, and interest, in and throughout the United States of America (including its territories and dependencies) and all countries foreign thereto, in and to and under said application (which term shall include hereinafter where the context so admits all divisional, continuing, reissue and other patent applications based thereon and all applications the priority of which is claimed therein) and the improvements (which term shall include each and every such improvement or invention, or any part thereof) therein described, and any and all patents and like rights of exclusion (including extensions thereof) of any country which may be granted on or for said improvements or on said application;
